

RECLAIMED PLANK CHERRY

Wide Plank Flooring

Our reclaimed wide plank Cherry can range from light golden blonde to a rich and vibrant red. It can contain natural saw marks for a more rustic appearance or be planed smooth for a more formal feel. Since this product is typically sawn from antique timbers when installed as flooring and exposed to UV light, the color can darken as traditional cherry flooring does.

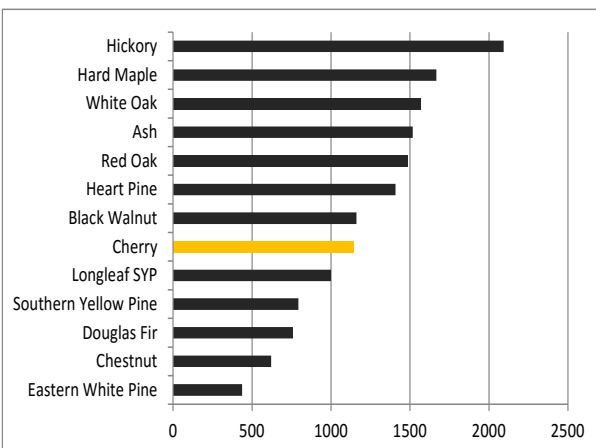

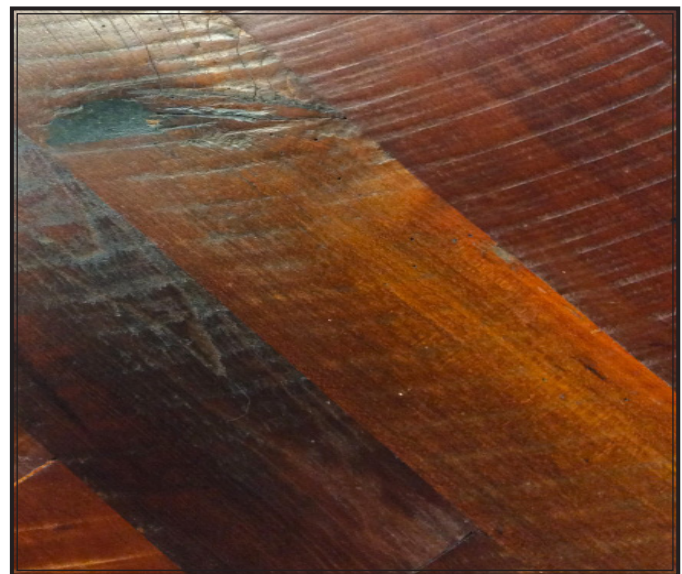

Reclaimed Cherry is generally sawn from antique beams and sleepers that hold up the structure. A sleeper beam is hewn flat on the top and tends to be round on the sides, sometimes still containing the bark from when the tree was originally cut down. Sleep beams are the main support structure of a barn and can be a range of oak, hickory, cherry, walnut and other hardwood species.

- Bingham's office, showroom, kilns and manufacturing plant are heated by using wood waste

*Please note that wood is a natural product and because of this we recommend ordering samples of our products before making your flooring choice. We will send multiple pieces of each product to give a full representation of the grade and specie. Together, these pieces represent the grade, specie or product specified. Please do not reference an individual sample, piece of the sample or image as an accurate representation of the entire grade, specie or product. Please consult your sales representative with any questions or to request more samples.
