

RECLAIMED PLANK HICKORY

Wide Plank Flooring

Bingham's reclaimed Hickory flooring is the hardest North American reclaimed hardwood species that we have to offer. With its natural density and its hundreds of years of strength and resilience from maintaining antique structures, this species can hold up in the toughest conditions. With varying color tones from golden blonde to a richer chocolate brown, it still maintains many of the striking characteristics of its newly sawn counterpart. However, due to the aging process and years of past use, there is weather checking, minimal nail holes and insect markings present. The coarse texture and rich tones enhance its natural beauty. Adding an oil finish lets the true colors come alive.

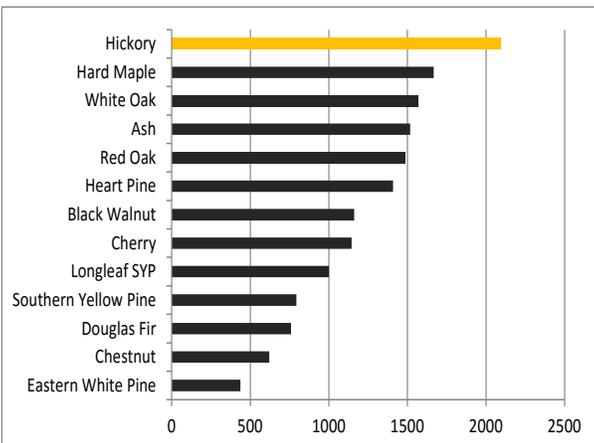

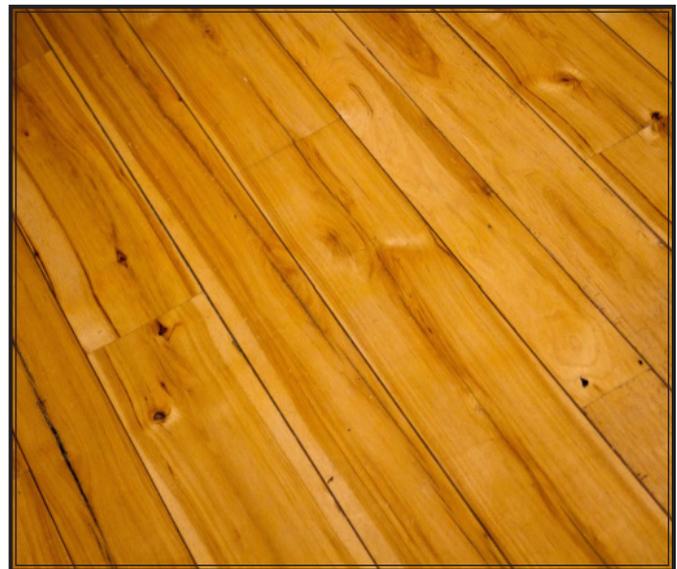

Reclaimed Hickory is generally sawn from antique beams and sleepers that hold up the structure. A sleeper beam is hewn flat on the top and tends to be round on the sides, sometimes still containing the bark from when the tree was originally cut down. Sleep beams are the main support structure of a barn and can be a range of oak, hickory, walnut and other hardwood species

SPECIFICATIONS

Plank Widths	3-5", 4-7", 8"+ available upon request
Plank Lengths	2-12'
Plank Thickness	3/4"
Edges	Square, Micro-Beveled or Handscraped
Texture	Planed Smooth
Profiles	Tongue and Groove, Square Edge or Ship-lap

100% GREEN

- Made in the U.S.A.
- Manufactured in N.H.
- Bingham's office, showroom, kilns and manufacturing plant are heated by using wood waste

*Please note that wood is a natural product and because of this we recommend ordering samples of our products before making your flooring choice. We will send multiple pieces of each product to give a full representation of the grade and specie. Together, these pieces represent the grade, specie or product specified. Please do not reference an individual sample, piece of the sample or image as an accurate representation of the entire grade, specie or product. Please consult your sales representative with any questions or to request more samples.
