# **SAFETY DATA SHEET**

DriFast® Natural

| Section 1. Identit   | fication  |
|--|---|
| GHS product identifier                                     | : DriFast® Natural  |
| Other means of identification                              | : Not available.  |
| Product type   | : Liquid.   |
| Relevant identified uses o                                 | f the substance or mixture and uses advised against   |
| Not applicable.  |   |
| Supplier's details   | : BonaKemi USA, Inc. (dba Bona US)<br>2550 S. Parker Road, Suite 600<br>Aurora, CO 80014 USA<br>(303) 371-1411  |
| Emergency telephone<br>number (with hours of<br>operation) | : 24 Hour Emergency Number: call CHEMTREC: US - 1-800-424-9300, International - 1-703-527-3887  |
| Section 2. Hazar   | ds identification   |
| OSHA/HCS status  | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).   |
| Classification of the substance or mixture                 | <ul> <li>FLAMMABLE LIQUIDS - Category 3<br/>SKIN CORROSION/IRRITATION - Category 2<br/>SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) -<br/>Category 3<br/>SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 1<br/>ASPIRATION HAZARD - Category 1</li> </ul>   |
| GHS label elements   |   |
| Hazard pictograms  |   |
| Signal word  | : Danger  |
| Hazard statements  | <ul> <li>Flammable liquid and vapor.<br/>Causes skin irritation.</li> <li>May be fatal if swallowed and enters airways.</li> <li>May cause drowsiness and dizziness.</li> <li>Causes damage to organs through prolonged or repeated exposure.</li> </ul>  |
| Precautionary statements                                   | <u>s</u>  |
| General  | : Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand.   |
| Prevention   | : Wear protective gloves. Wear eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating, lighting and all material-handling equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Keep container tightly closed. Use only outdoors or in a well-ventilated area. Do not breathe vapor. Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling |

# Section 2. Hazards identification

| Optime displattentian if you feel you all JE INHALED. Demons visiting to feech air and  |
|---|
| : Get medical attention if you feel unwell. IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or physician if you feel unwell. IF SWALLOWED: Immediately call a POISON CENTER or physician. Do NOT induce vomiting. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing. If skin irritation occurs: Get |
| medical attention. In case of fire: Use CO2, dry chemical or foam for extinction.   |
| : Store locked up. Store in a well-ventilated place. Keep cool.   |
| : Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| : None known.   |
|   |

### Section 3. Composition/information on ingredients

| Substance/mixture | : | Mixture        |
|-------------------|---|----------------|
| Other means of    | : | Not available. |
| identification    |   |                |

#### **CAS number/other identifiers**

| CAS number   | : Not applicable. |
|--------------|-------------------|
| Product code | : Not available.  |

| Ingredient name                            | % | CAS number                            |
|--|---|---------------------------------------|
| Solvent naphtha (petroleum), medium aliph. |   | 8052-41-3<br>64742-88-7<br>64742-48-9 |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

#### **Description of necessary first aid measures**

| Eye contact  | <ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower<br/>eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10<br/>minutes. Get medical attention.</li> </ul>  |
|--------------|--|
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.  |
| Skin contact | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
| Ingestion    | : Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Aspiration hazard if swallowed. Can enter lungs and cause damage. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, |

### Section 4. First aid measures

tie, belt or waistband.

#### Most important symptoms/effects, acute and delayed

| Potential acute health effe | <u>cts</u> |  |
|-----------------------------|------------|--|
| Eye contact                 | :          | No known significant effects or critical hazards.  |
| Inhalation                  | :          | Can cause central nervous system (CNS) depression. May cause drowsiness and dizziness.   |
| Skin contact                | :          | Causes skin irritation.  |
| Ingestion                   | :          | Can cause central nervous system (CNS) depression. May be fatal if swallowed and enters airways.   |
| Over-exposure signs/symp    | oton       | <u>15</u>  |
| Eye contact                 | :          | Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness   |
| Inhalation                  | :          | Adverse symptoms may include the following:<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness  |
| Skin contact                | :          | Adverse symptoms may include the following:<br>irritation<br>redness   |
| Ingestion                   | :          | Adverse symptoms may include the following: nausea or vomiting   |
| Indication of immediate me  | dica       | l attention and special treatment needed, if necessary   |
| Notes to physician          | :          | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.  |
| Specific treatments         | :          | No specific treatment.   |
| Protection of first-aiders  | :          | No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |
|                             |            |  |

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| Extinguishing media                        |   |
|--|---|
| Suitable extinguishing media               | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media             | : Do not use water jet.   |
| Specific hazards arising from the chemical | : Flammable liquid and vapor. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products   | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>metal oxide/oxides  |

# Section 5. Fire-fighting measures

| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
|--|--|
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

### Section 6. Accidental release measures

| Personal precautions, protec   | tive equipment and emergency procedures  |
|--------------------------------|--|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment.  |
| For emergency responders       | : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to<br>the environment if released in large quantities.  |
| Methods and materials for co   | ontainment and cleaning up   |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

# Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures                    | : Put on appropriate personal protective equipment (see Section 8). Do not breathe vapor or mist. Do not swallow. Avoid contact with eyes, skin and clothing. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|--|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |

# Section 7. Handling and storage

| Conditions for safe storage,<br>including any<br>incompatibilities | Store in accordance with local regulations. Store in a segregated and approved area.<br>Store in original container protected from direct sunlight in a dry, cool and well-ventilated<br>area, away from incompatible materials (see Section 10) and food and drink. Store<br>locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep<br>container tightly closed and sealed until ready for use. Containers that have been<br>opened must be carefully resealed and kept upright to prevent leakage. Do not store in<br>unlabeled containers. Use appropriate containment to avoid environmental |
|--|--|
|  | contamination.   |

# Section 8. Exposure controls/personal protection

#### Control parameters

**Occupational exposure limits** 

| Ingredient name                            | Exposure limits                          |
|--|--|
| Stoddard solvent                           | ACGIH TLV (United States, 4/2014).       |
|  | TWA: 100 ppm 8 hours.                    |
|  | TWA: 525 mg/m <sup>3</sup> 8 hours.      |
|  | OSHA PEL 1989 (United States, 3/1989).   |
|  | TWA: 100 ppm 8 hours.                    |
|  | TWA: 525 mg/m <sup>3</sup> 8 hours.      |
|  | NIOSH REL (United States, 10/2013).      |
|  | TWA: 350 mg/m <sup>3</sup> 10 hours.     |
|  | CEIL: 1800 mg/m <sup>3</sup> 15 minutes. |
|  | OSHA PEL (United States, 2/2013).        |
|  | TWA: 500 ppm 8 hours.                    |
|  | TWA: 2900 mg/m <sup>3</sup> 8 hours.     |
| Solvent naphtha (petroleum), medium aliph. | OSHA PEL 1989 (United States, 3/1989).   |
|  | TWA: 100 ppm 8 hours.                    |
|  | TWA: 400 mg/m <sup>3</sup> 8 hours.      |
|  | OSHA PEL (United States, 2/2013).        |
|  | TWA: 100 ppm 8 hours.                    |
|  | TWA: 400 mg/m <sup>3</sup> 8 hours.      |

| Appropriate engineering controls | :    | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.                       |
|----------------------------------|------|---|
| Environmental exposure controls  | :    | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |
| Individual protection meas       | ures |   |
| Hygiene measures                 | :    | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location. |
| Eye/face protection              | :    | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.  |
| Skin protection                  |      |   |
|                                  |      |   |

# Section 8. Exposure controls/personal protection

| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this is<br>necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection time of the gloves cannot be accurately estimated. |
|------------------------|--|
| Body protection        | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear antistatic protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.   |
| Other skin protection  | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.  |

# Section 9. Physical and chemical properties

| Appearance                                   |   |
|--|---|
| Physical state                               | : Liquid.   |
| Color  | : Amber. [Light]  |
| Odor   | : Mild. Solvent.  |
| Odor threshold                               | : Not available.  |
| рН   | : Not applicable.   |
| Melting point                                | : Not available.  |
| Boiling point                                | : Not available.  |
| Flash point                                  | : Closed cup: 47°C (116.6°F) [Setaflash.]                         |
| Evaporation rate                             | : Not available.  |
| Flammability (solid, gas)                    | : Not available.  |
| Lower and upper explosive (flammable) limits | : Not available.  |
| Vapor pressure                               | : Not available.  |
| Vapor density                                | : Not available.  |
| Relative density                             | : 0.86  |
| Solubility                                   | : Insoluble in the following materials: cold water and hot water. |
| Partition coefficient: n-<br>octanol/water   | : Not available.  |
| Auto-ignition temperature                    | : Not available.  |
| Decomposition temperature                    | : Not available.  |
| Viscosity                                    | : Not available.  |

# Section 10. Stability and reactivity

| Reactivity                         | : | No specific test data related to reactivity available for this product or its ingredients. |
|------------------------------------|---|--|
| Chemical stability                 | : | The product is stable.   |
| Possibility of hazardous reactions | : | Under normal conditions of storage and use, hazardous reactions will not occur.            |

6/13

# Section 10. Stability and reactivity

| Conditions to avoid              | : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. |
|----------------------------------|---|
| Incompatible materials           | : Reactive or incompatible with the following materials:<br>oxidizing materials   |
| Hazardous decomposition products | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |

#### Numerical measures of toxicity

Acute toxicity estimates Not available.

# Section 12. Ecological information

#### **Toxicity**

Not available.

#### Persistence and degradability

| Product/ingredient name                    | Aquatic half-life | Photolysis | Biodegradability |
|--|-------------------|------------|------------------|
| Naphtha (petroleum),<br>hydrotreated heavy | -                 | -          | Readily          |

#### **Bioaccumulative potential**

| Product/ingredient name                    | LogPow | BCF        | Potential |
|--|--------|------------|-----------|
| Naphtha (petroleum),<br>hydrotreated heavy | -      | 10 to 2500 | high      |

#### Mobility in soil

| Soil/water partition | : Not available. |
|----------------------|------------------|
| coefficient (Koc)    |                  |

#### Other adverse effects

: No known significant effects or critical hazards.

### Section 13. Disposal considerations

**Disposal methods** 

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### Section 14. Transport information

### Section 16. Other information

Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks Although HMIS® ratings are not required on SDSs under 29 CFR 1910. 1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered mark of the National Paint & Coatings Association (NPCA). HMIS® materials may be purchased exclusively from J. J. Keller (800) 327-6868.

The customer is responsible for determining the PPE code for this material.
